MACD Launches Exchange System Aixecute

MACD launches a fully functional exchange software including all components needed to run an exchange or an internal market. The trading platform OTC-X of the Berner Kantonalbank BEKB | BCBE and the BX Berne eXchange are the first customers to use Aixecute as their exchange system. For Aixecute we developed components to handle the matching engine, FIX connectivity, settlement links, interfaces to data vendors, index calculation and reporting functionalities. Aixecute will be hosted at MACD, enabling all GLOX customers to access BX Berne eXchange.

GLOX 8.2 Release Plan
