DIGITAL ASSETS TRADING

Automated Trading
of Digital Assets

MARK DAMBACHER, CEO
INCORE BANK:

„We notice that digital assets are being addressed by a growing number of banks. But technical and operational challenges are a deterrent. This is where InCore Bank comes in with its offer. The customers use the existing set-up without any integration effort and immediately start trading and custody, which runs through InCore Bank.“

COMPLETELY AUTOMATIC CONNECTION

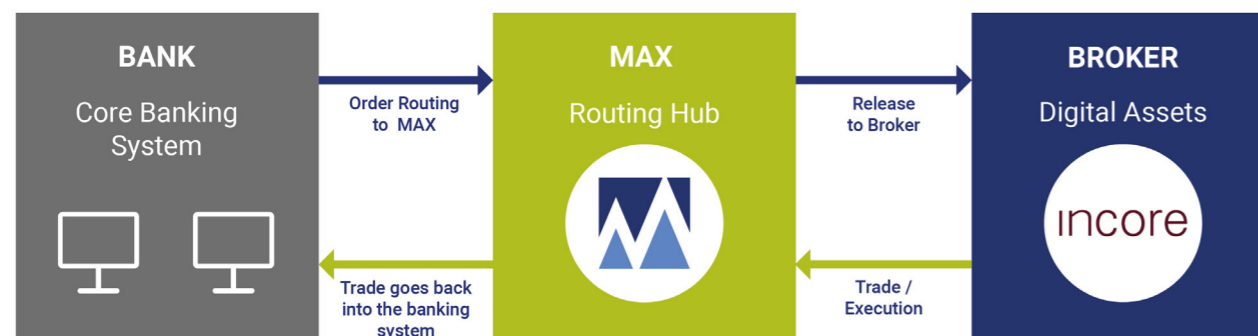

In cooperation with the business-to-business banking service provider InCore Bank AG, MACD offers trading in cryptocurrencies and a variety of other digital assets.

The joint solution enables all MACD customers to trade and hold assets automatically via existing interfaces to their core banking systems.

Orders are routed via Straight Through Processing (STP) technology from the core banking system to InCore Bank via the MAX Routing Hub or can be entered directly into the MAX Order Management System. Execution and confirmation is fully automated back to the core banking system.

THE ADVANTAGES:

- ✓ There are no additional costs for the connection and maintenance of another system. The integration takes place in the existing trading infrastructure of the client bank.
- ✓ Due to the high degree of automation (STP), double entries and manual input are reduced to a minimum.
- ✓ Custody takes place seamlessly at the InCore Bank via its highly secure, bank-grade custody solution. This does not require a complex integration project.

MAX SERVICES

- ✓ Exchange Direct
- ✓ Broker Connect
- ✓ Customer Connect
- ✓ Data Service
- ✓ Multi Broker Network
- ✓ Fund Trade
- ✓ FX Trading
- ✓ Digital Assets Trading
- ✓ Routing Hub

CHOOSE MORE MAX FUNCTIONALITIES
